

Entering Procedures into Flow Charts

- Make one entry per provider per procedure
- Make sure the Provider Number is entered
- The Success Box works
- Use the Attempts field for multiple attempts by the same provider

The screenshot displays the 'Flow Chart' tab of an EMS software interface. The window title is '0016537 - 000 Incident Form On ARCTIC Blvd at W 47TH Ave'. The interface includes a menu bar (File, Edit, Routine, Help) and a toolbar. Key fields include: Incident Number (0016537), Exposure (000), Alarm (08:38:38), Arrival (08:41:39), and Cleared (08:59:15). The 'Advanced EMS' tab is active, showing 'Event Details' for a procedure: Aid Given (24-IV), Solution (01-Saline), Site (LT AC), Size (18.0), Rate (03-BOL), and Remarks (200 cc). The 'Event Provider' is listed as 'Holsman, David J' with ID '1336'. The 'Events' list at the bottom shows a sequence of events, with the current event highlighted: '08:44:39 IV Solution=Saline, Site=LT AC, Size=18, Rate=BOL, Attempts=1, Remarks: 200 cc'. Buttons for 'Add' and 'Delete' are visible next to the event list.
